Md Faiz Alam

+91-6207195860 — alammdfaiz36@gmail.com — GitHub — LinkedIn

SUMMARY

M.Tech Computer Science student at NIT Jalandhar with strong foundations in DSA, OOP, DBMS, and Operating Systems. Skilled in C++, Python, SQL, HTML, CSS, Machine Learning, Deep Learning, and Generative AI, with hands-on experience developing healthcare AI and web applications. GATE qualified, passionate about building efficient and scalable software solutions.

EDUCATION

Dr. B R Ambedkar National Institute of Technology, Jalandhar 2025 – Present
Master of Technology (Computer Science & Engineering) CGPA: 7.75

IK Gujral Punjab Technical University 2019 – 2023
Bachelor of Technology (Computer Science & Engineering) CGPA: 7.82

TECHNICAL SKILLS

Languages: C, C++, Java, Python

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Machine Learning

Development Tools: Git, GitHub, VS Code

Operating Systems: Linux, Windows

Databases: SQL, MySQL, MongoDB

Vector Databases: FAISS, ChromaDB

AI/ML Frameworks: TensorFlow, Keras, Scikit-learn, LangChain, Hugging Face

Generative AI: LLMs, RAG, AI Agents, Prompt Engineering, Embeddings, Vector Search, Semantic Retrieval

Backend: FastAPI, Django , Streamlit

Web Technologies: HTML, CSS, JavaScript, React.js, Node.js

Libraries: NumPy,Pandas,Matplotlib ,OpenCV

PROJECTS

- **AI Healthcare Report Analyzer- GitHub**
  Python, LangChain, RAG, Hugging Face Embeddings, ChromaDB, Groq API, Streamlit
  - Developed a Python and Streamlit application for medical PDF summarization and document-based question answering.
  - Built a RAG pipeline using LangChain, PyMuPDF, Hugging Face embeddings, and ChromaDB for semantic retrieval.
  - Integrated Groq LLM for context-grounded responses, structured summaries, and laboratory result visualization.

- **Responsive University Web Portal - GitHub**
  HTML5, CSS3
  - Developed a university website featuring Home, About, Courses, Blog, and Contact sections.
  - Implemented website navigation and a hero section with background imagery and call-to-action elements.
  - Designed page layouts using CSS to improve visual presentation and usability.

- **Plant Disease Detection System using EfficientNetB0 - GitHub**
  Python, TensorFlow, Keras, EfficientNetB0, PlantVillage, FastAPI, React, OpenCV, Grad-CAM, SQLiteI

- Trained an EfficientNetB0 transfer-learning model on the PlantVillage dataset to classify leaf images into 15 plant disease classes..
- Evaluated the model using accuracy, precision, recall, F1-score, and confusion matrix.
- Developed a full-stack React and FastAPI application with batch prediction, confidence scores, Grad-CAM explanations, SQLite prediction history, and CSV export.

EXPERIENCE

- **VMweb soft , Mohali** Jan 2023 – june 2023
  Summer Intern
  * Gained hands-on experience with HTML, CSS, JavaScript, and React.js for frontend development.
  * Practiced building web interfaces using frontend technologies and responsive design principles..

ACHIEVEMENTS

- GATE Qualified – 2025, 2026.
- NPTEL Joy of Computing Using Python (Elite, 78%).
